# Arquitetura da Aplicação

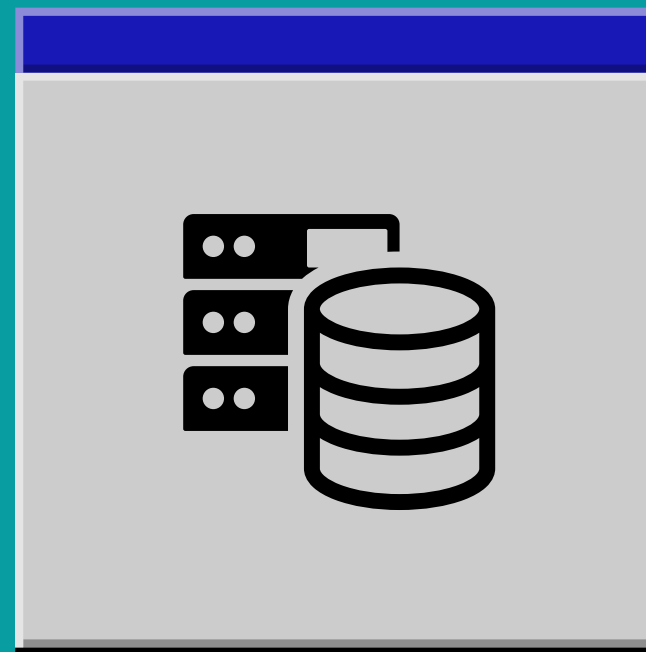

# ARQUITETURA DE APLICAÇÃO

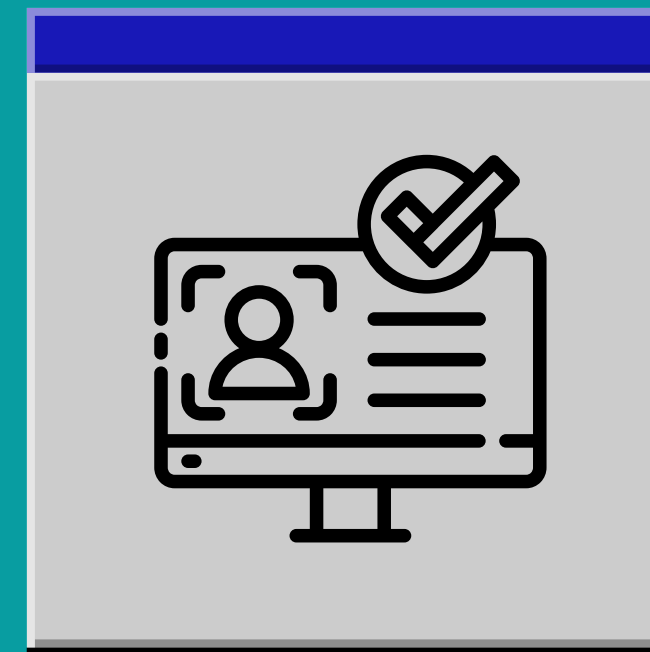

## WEB:

Sistema encarregado de armazenar todos os arquivos, desde o Back-end até o Front-end da aplicação, gerenciando tanto a estrutura quanto a apresentação visual dos sites.

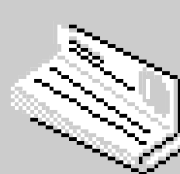

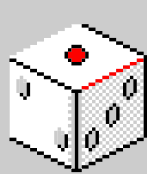

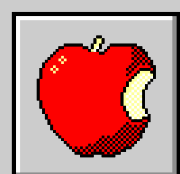

## DATABASE:

Máquina encarregada do banco de dados, responsável por armazenar e recuperar todas as informações geradas pelo servidor web.

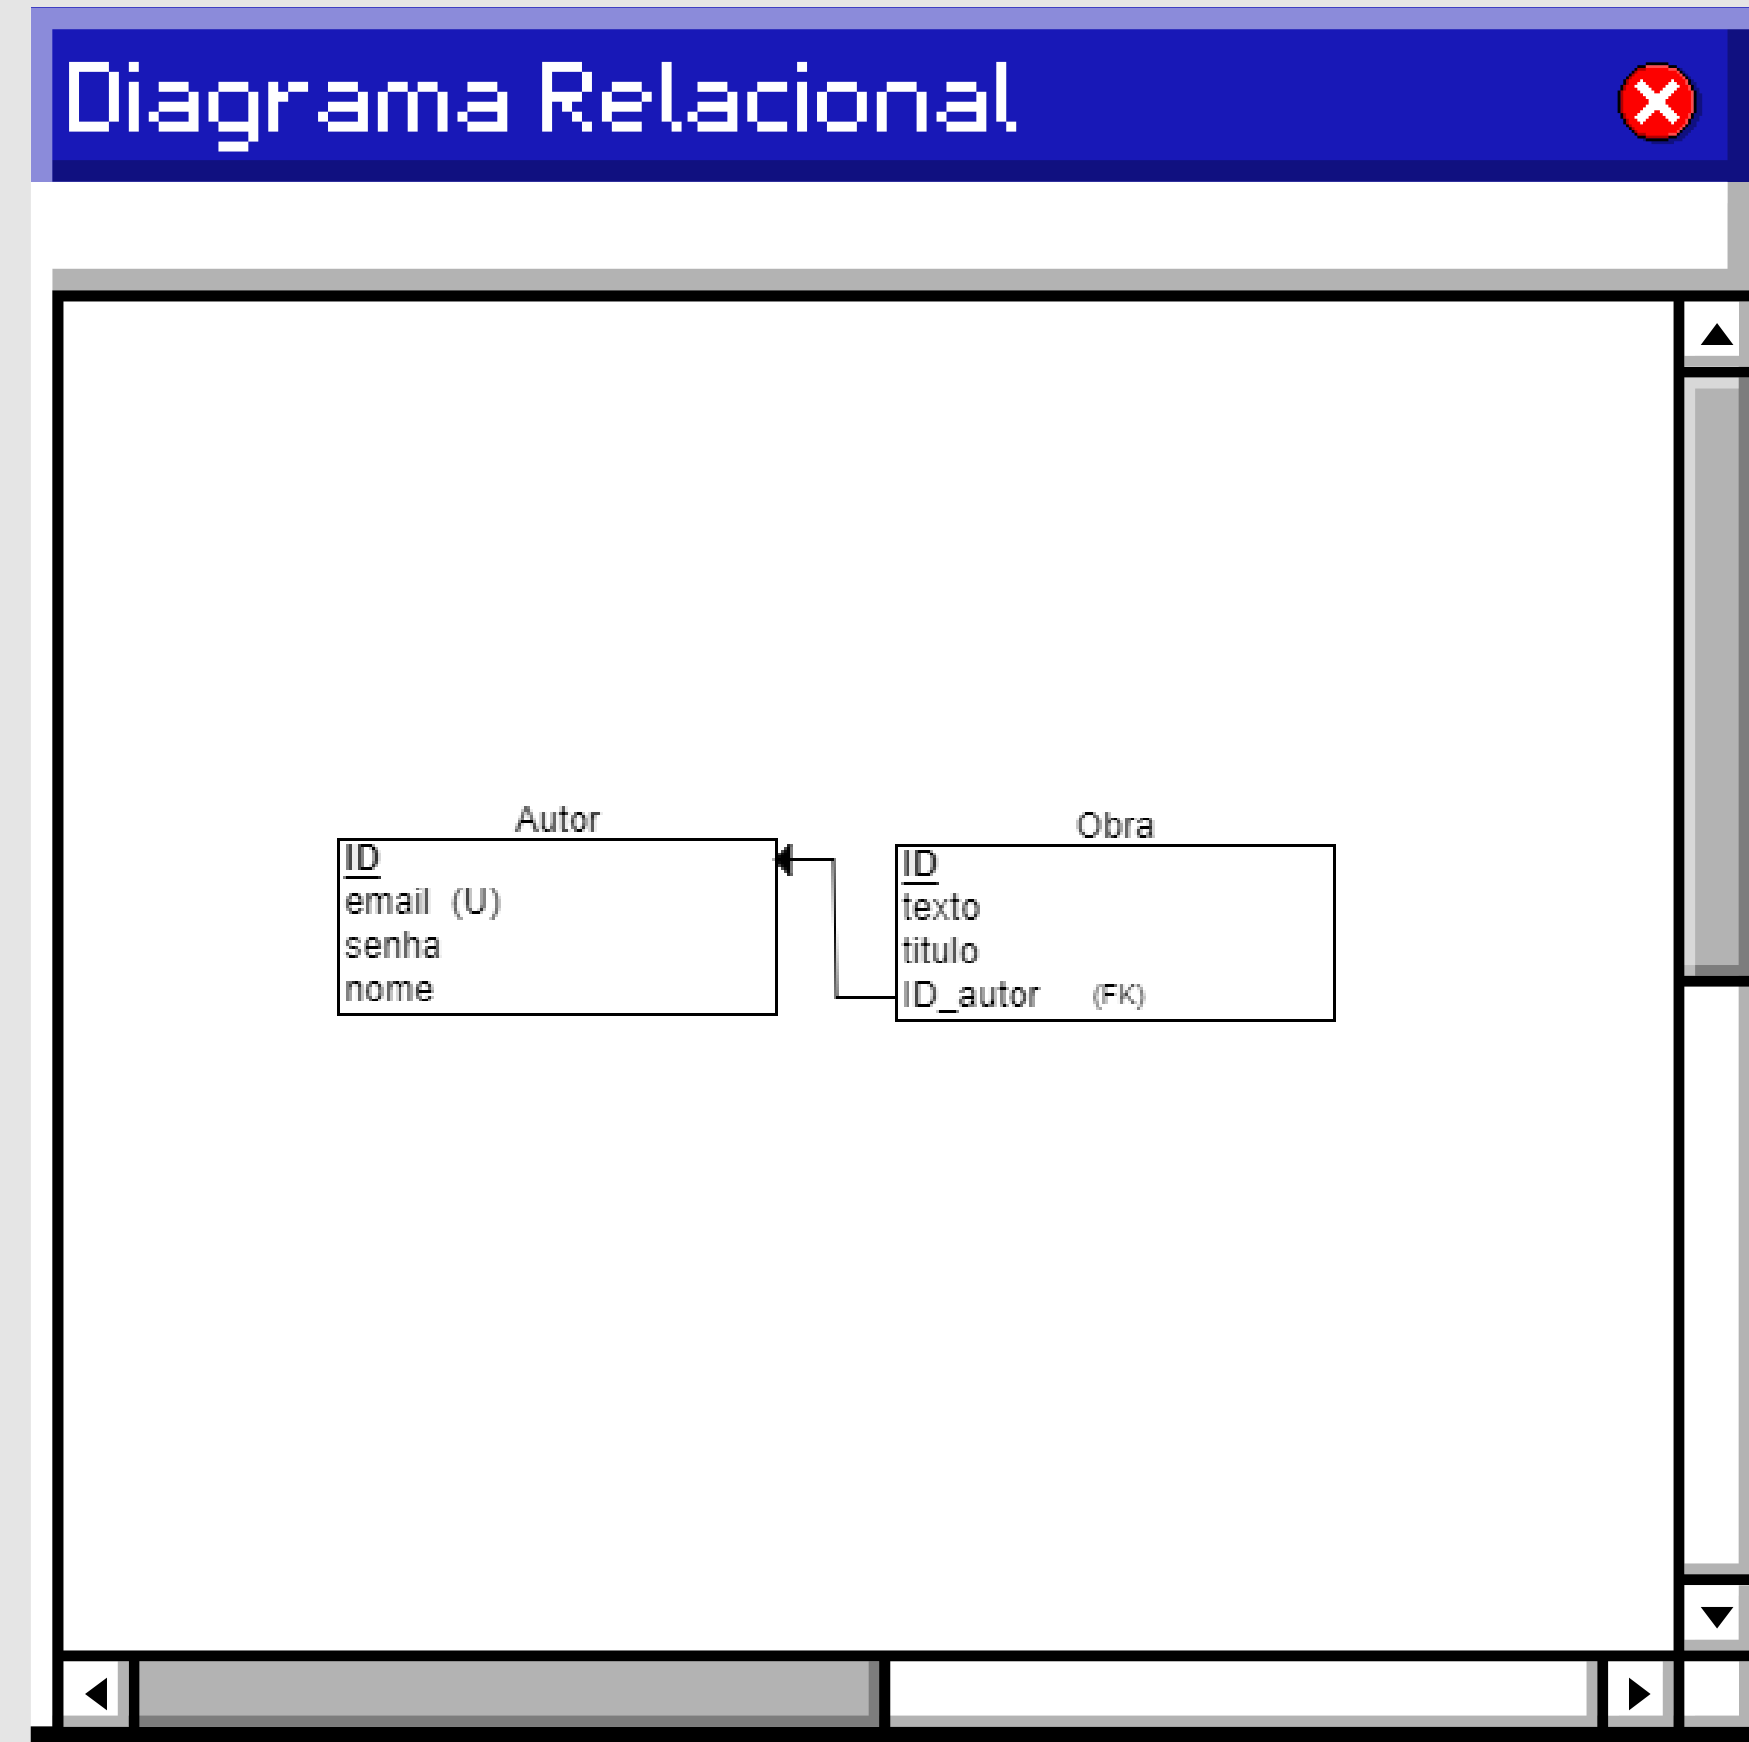

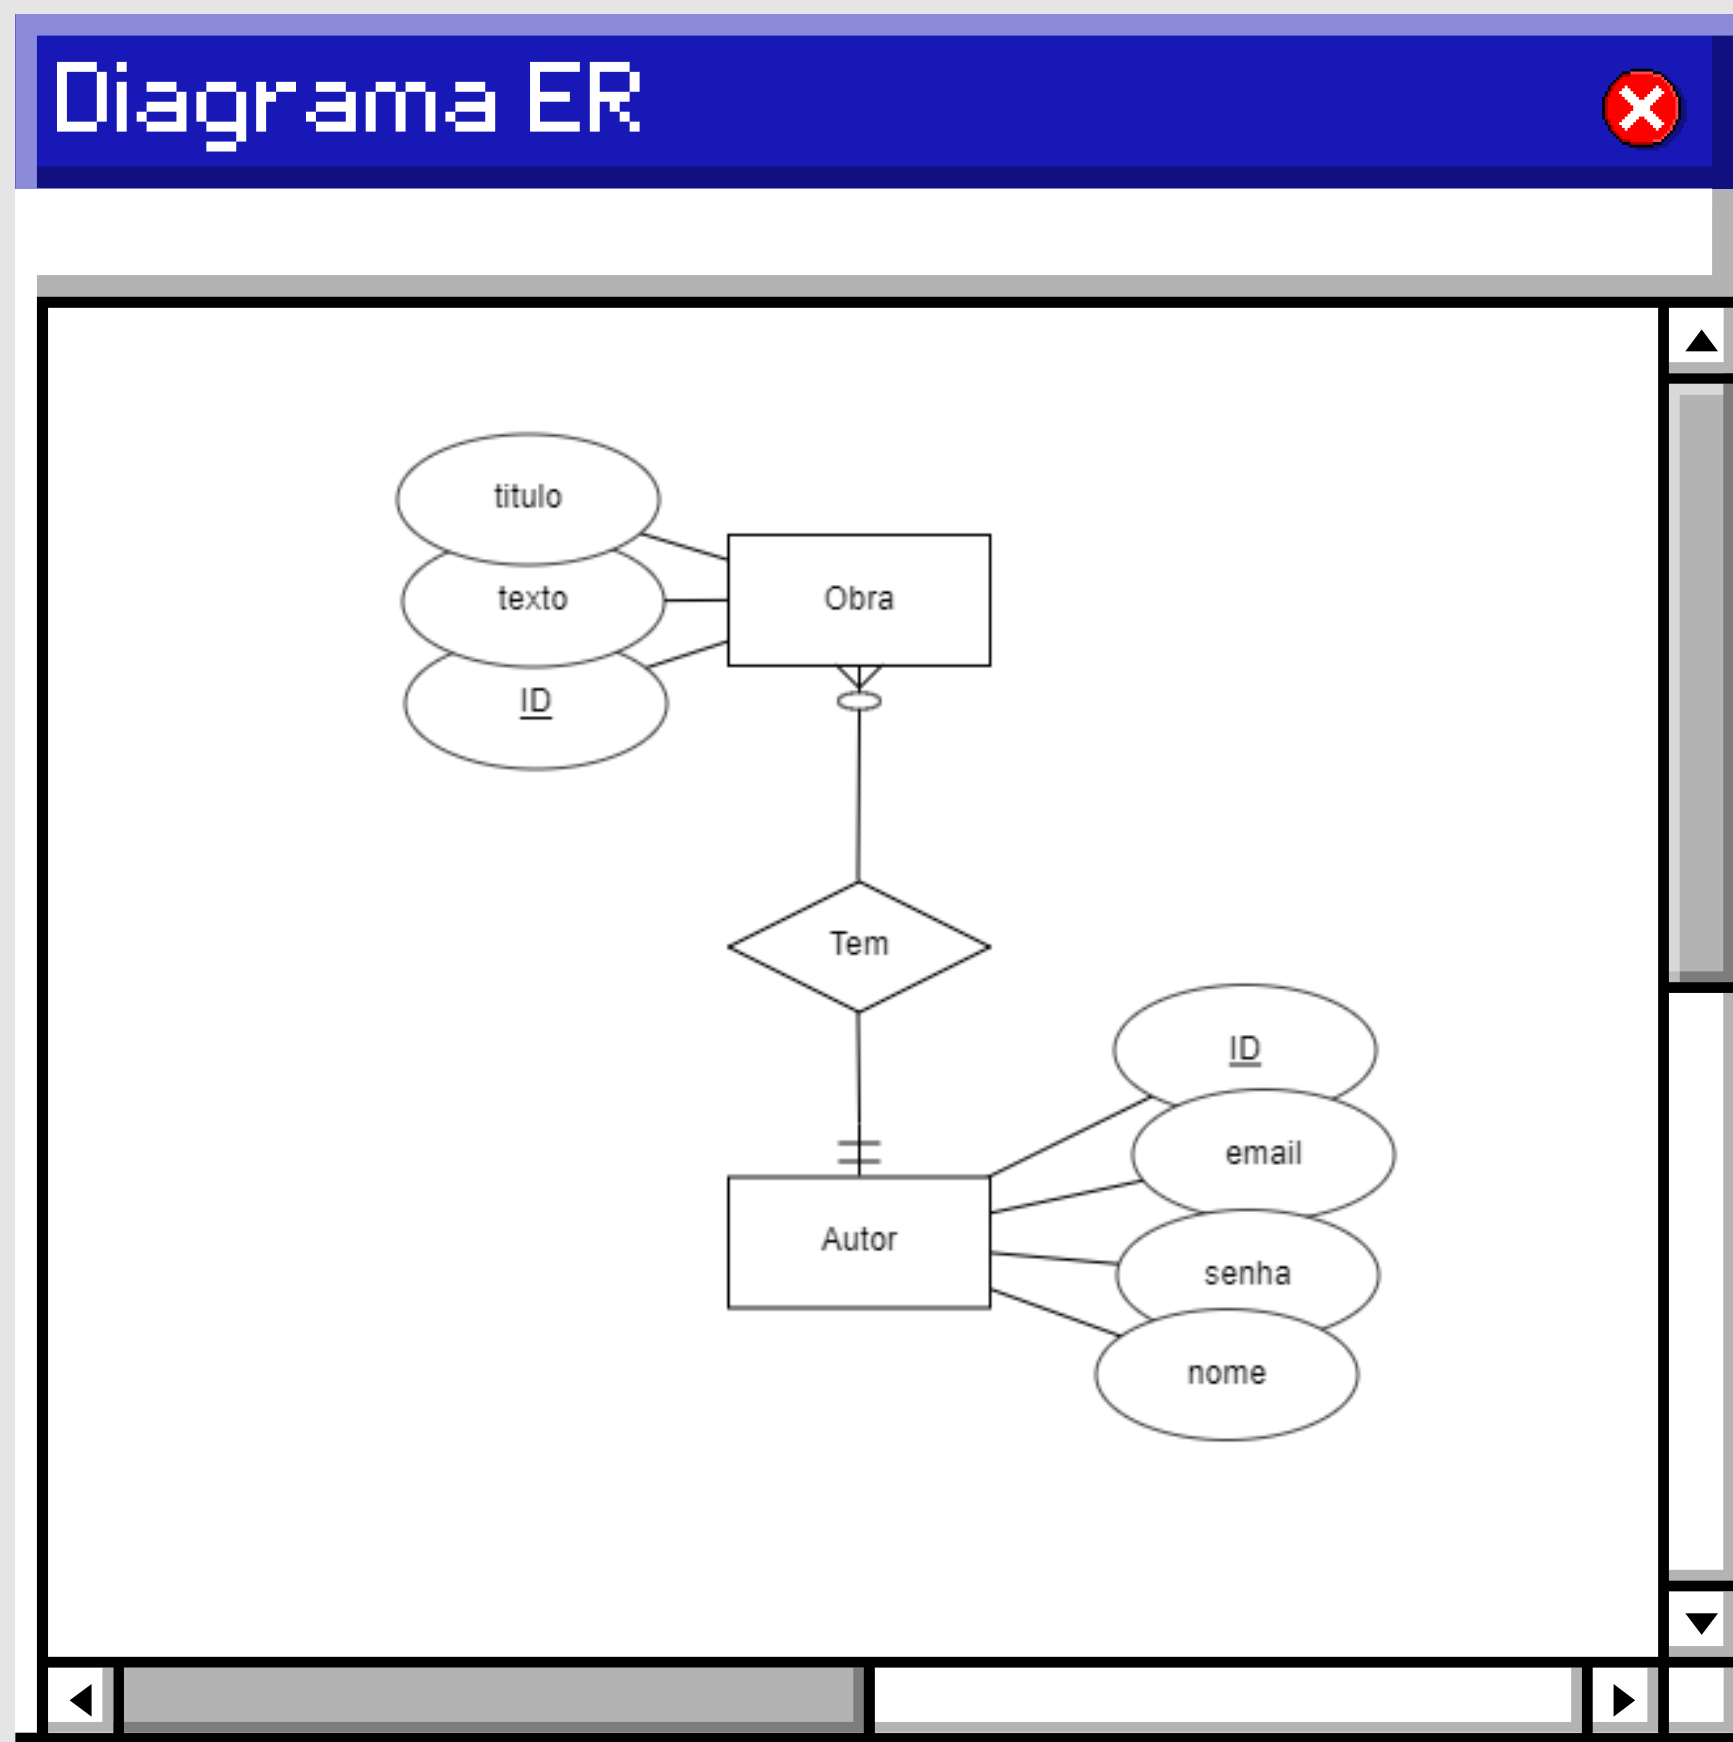

## GUI:

Dispositivo do usuário final encarregado de acessar a máquina que hospeda o servidor web.

# Thank you!

Valeu ai! E passar bem. ;)
